

## Technical Parameter

- ⊙ Lock size : 130L\*105W\*39H mm
- ⊙ Voltage : DC12V±10%
- ⊙ Working current : 350mA, Static current: 25mA
- ⊙ Operating temp : -20~+50°C
- ⊙ Iron lock tongue with plate
- ⊙ Lock tongue reach-out length: 20mm
- ⊙ Single cylinder, with remote control
- ⊙ Working way : closed automatically senses locked
- ⊙ Finishing : nickel plating
- ⊙ Materials of lock body : iron

## Advantages

- ⊙ It is an intelligent electric motor lock, can be automatically lock itself when door is closed
- ⊙ Remote control, key and knob can unlock
- ⊙ Low noise, Low consumption long life, convenient installation
- ⊙ Lock signal output or door signal output, or remote control is customizable
